

## THE SOCIAL WORKER

As a social worker practicing in a school environment, her work consists in supporting students toward optimizing their learnings and their achievements through their well-being and social adjustment.

Challenges include learning difficulties, low self-esteem, peer relationships, sexuality, conflict with parents or the law, substance abuse, the goal always being to encourage the empowerment of the individual.

Since many factors influence students' lives and behaviors, she is dedicated to facilitating the students' academic paths in their environment, along with peer's and family relationships, teachers, families, other professionals and communities when needed.

Anne-Marie pays particular attention in ensuring that her office is a safe and neutral space, with the students' needs at the center of her interventions.
